

Electric Vehicle Rebate/Rate Program

Logistics

Purpose

Piedmont Electric desires to be informed of the purchase of plug-in electric vehicles and charging devices attached to the power grid. This information will assist Piedmont Electric in supplying a more reliable and stronger grid system. By knowing the needs of vehicle charging requirements, Piedmont Electric can better plan, build and maintain the grid. To better facilitate the gathering of this information, Piedmont Electric is offering a \$50.00 rebate in the form of a bill credit to members who inform us of their ownership of a plug-in electric vehicle.

Piedmont Electric has also developed an electric power rate designed specifically for members who charge a plug-in electric vehicle at their residence. This electric rate is a time-of-day structure priced tariff, designed to allow members to charge electric vehicles during off-peak hours at a reduced cost. This will help to shift the power demands on the grid to a lower system load time, reducing the cost of the power. Piedmont Electric is offering a \$50.00 rebate in the form of a bill credit to members who adopt this electric vehicle time-of-day energy rate for their residence.

Availability:

This Schedule is available only on a voluntary basis, at the Cooperative's option. The Cooperative reserves the right to limit the number of members based upon the saturation and/or impact on the Cooperative's electric system of members utilizing this rate schedule in a general area. This rate is available only to consumers who would otherwise be served by the Residential or Small General Service schedules and who own or lease a plug-in electric vehicle.

This schedule is not currently available to consumers served under either of the Cooperative's Net Metering Riders.

Policy

- Piedmont Electric members who purchase or lease a plug-in electric vehicle may qualify to receive a \$50.00 rebate in the form of a bill credit for informing Piedmont Electric of their vehicle purchase.
- Members must supply Piedmont Electric with a copy of the vehicle registration showing ownership.
- Multiple vehicles will qualify for multiple rebates.

- Energy Services group will manage request.
- Members who adopt the TIME-OF-DAY PLUG-IN ELECTRIC VEHICLE SCHEDULE **R/SGS-TOD-E-PEV** rate, will also receive a one-time \$50.00 rebate in the form of a bill credit.
- Contract Period: Any consumer choosing to be served under this time-of-day schedule must remain on the schedule for at least one year, unless the consumer agrees to pay the Cooperative a fee of fifty dollars (\$50) to cover the cost of reprogramming the meter.
